Liefgreen's Anemones

These lovely flowers are deservedly popular. With an exceedingly wide range of color and color combinations, and an adaptability for both forcing and outdoor planting, the Anemone is a most useful and satisfactory flower. The plants thrive best in a rather rich, sandy loam, but will do well in most any well drained garden soil. Ready September 1st.

Culture: For pot forcing, place six or more in a pot of proportionate size and handle the same as Tulips and Hyacinths, keeping them well watered at blooming time. For outdoor, they are suitable for borders, rockeries and mass bedding. Plant the tubers 6 to 7 inches apart, 2 inches deep, laid flat with the growing knobs upward. Soaking the tubers before planting hastens the blooming. In warm climates, free of heavy freezing, Anemones may be planted from early fall to early spring and several plantings will produce a continuous bloom in 4 to 5 months' time. Under colder conditions, a mulching of leaves and litter is necessary and in regions subject to extreme cold, the tubers should be carried over in a cold frame and planted in the spring. After flowering and the leaves have dried off, lift the tubers, dry and store in dry sand until next planting time. In warm climates they may remain in the ground and rested under rather dry conditions.

ANEMONES MONARCH DE CAEN

A magnificent robust growing strain of Poppy Anemone with immense saucer shaped flowers of the most brilliant and varied colors from pink to beautiful shades of blue and brilliant scarlet, borne on long strong stems. Bulbs are small but produce a flower of amazing size.

"Giant Tecolote" Ranunculus

By far the most magnificent strain of Ranunculus ever offered to the public. Flowers very double, blended with semi-double. Centers are usually light green. Our mixture contains a beautiful range of colors. Do not confuse them with the cheap kinds offered at bargain prices. All sizes as offered are strictly up to standard.

Culture: In warm climates, Ranunculus may be planted in early fall for winter bloom and from that time in succession until spring. For pot grown winter flowers, plant early in fall, water thoroughly and plunge in ashes or sand until they are sprouted.

The bulbs resemble tiny clumps with finger-like projections which should be planted pointed down. Soak the bulbs in water 2 hours and cover about 2 inches deep, 4 to 5 inches apart, and if soil is at all heavy, cover with peat moss in order that leaves will push through readily without heaving the soil. A rich under-soil is desirable, but use no fresh fertilizer around the bulb. Plant in a partly shaded location, particularly if grown for blooming in late spring or early summer, otherwise if planted in locations like the Phoenix, Arizona, valley during the fall months, in a sunny, open location. An abundance of water and good drainage are essential.

JUMBO SIZE—1 inch up. Extra large bulbs. Mixed colors. 8c each; 85c per dozen; \$6.00 per 100.

LARGE TOP SIZE—3/4 to 7/8 inch. Large bulbs. Mixed colors. 7c each; 75c per doz.; \$4.50 per 100.

No. 1 SIZE—5/8 to 3/4 inch. Mixed colors. 5c each; 50c doz.; \$3.00 per 100.

No. 2 SIZE—1/2 to 5/8 in. Mixed colors. 5c for 2; 25c doz.; \$1.75 per 100.

SEPARATE COLORS

GOLD SHADES—Large top size 3/4 to 7/8 in. Colors running from straw through the entire range of yellows to deep golden yellow.

Liefgreen's Fragrant Freesias

Ready in August

An easily grown, attractive and fragrant flower for both indoor and outdoor culture. Few bulbs flourish in the home window with so little care as do the Freesias, and a single plant in flower will soon fill the room with a most delicate perfume. The new colored varieties are charming and all make excellent cut flowers.

Freesia Culture: Freesias may be planted from August 15th, through January. They are easily grown, blossom freely in early spring and the bulbs will multiply and continue blooming for years. The soil should be well prepared, and though they grow well in full sun, they also may be planted in partial shade. All Freesias are fragrant and make good cut flowers.

Plant the bulbs one to two inches apart and cover to a depth of about two inches. In place of a single row place bulbs to make a row three or four inches wide, giving a very nice effect.

Freesias may be left in the ground from year to year or if they are taken up it should be done after the foliage has become entirely cured or dry.

Liefgreen's Colored Freesias

Mixed Colors—A special mixture and a careful blend of all colors. No whites are included.

Special Top Size—50c per dozen; \$1.50 for 50; \$3.00 per 100.

No. 1 Size—30c per dozen; \$2.00 per 100.

Liefgreen's Pure White Freesias

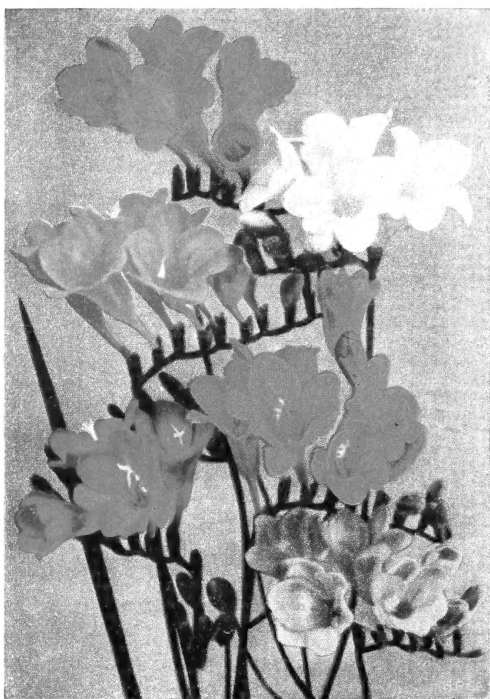

Purity Superflora

This is an improved white. Very large flowers of good substance and delightfully scented.

Large Size Bulbs—40c per dozen; \$1.25 for 50; \$2.50 per 100.

No. 1 Size—25c per dozen; \$1.00 for 50; \$1.75 per 100.

All bulbs are sent postpaid.

Liefgreen's Beautiful All-Colored Freesias

AGAPANTHUS UMBELLATUS

(Blue Lily of the Nile)

A splendid ornamental plant bearing in early summer clusters of bright blue flowers on long stems standing well above the foliage. Does well in this section, but may not flower first year. Plant from November to March—large rooted divisions. Each 60c, f.o.b. Phoenix. Each 75c, postpaid.

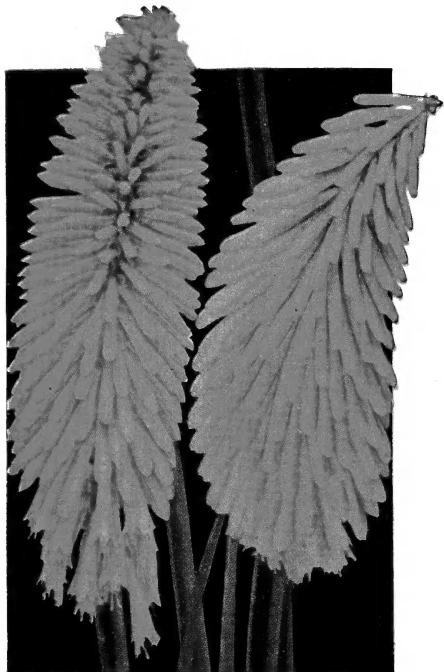

ORNITHOGALUM Arabicum (Star of Bethlehem)

Throws up a tall stem with a cluster of star-shaped flowers; pure white with dark centers. Excellent for cutting, lasting a long time in water. Culture in the house is about the same as for Hyacinths. 20c for 3; 75c per dozen; \$5.50 per 100. Postpaid.

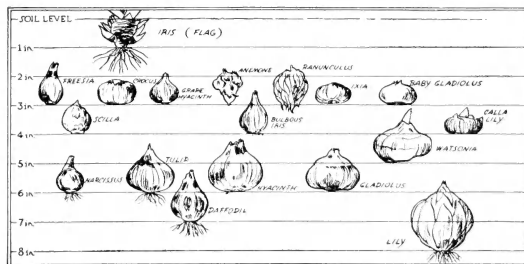

TRITOMA

Commonly called Red Hot Poker, Torch Lily, or Flame Flower.

TRITOMA HYBRIDS—A strong free flowering Red Hot Poker. Range in color from yellow to a beautiful deep orange. They are very hardy and bloom in the spring and fall, in 6-inch pots or gallon cans. 50c each. Postpaid, 75c.

Tritoma

Plant Bulbs to the Depth Indicated

Daffodils and Narcissus

All varieties are easy to grow and are very popular as cut flowers because of their splendid keeping qualities. They may be grown in cultivated beds or borders or in the shrubby border where they may be allowed to naturalize. While they prefer partial shade, they will thrive in full sun. Plant from late September through January in any good garden soil, covering to a depth of 5 inches.

All Narcissus may be grown in Bulb fibre and culture is the same as for Hyacinths.

Trumpet Daffodils

KING ALFRED—This is one of the largest flowers and longest stemmed varieties now being offered. The flowers are pure yellow, the trumpet is slightly frilled and usually 3 or 4 flowers are produced from each bulb.

Jumbo Bulbs—20c each; 90c for 6; \$1.75 per dozen; \$11.00 per 100.
Extra Large Bulbs—15c each; 80c for 6; \$1.50 per dozen; \$9.00 per 100.

SPRING GLORY—Yellow trumpet with creamy white perianth. Large bold flower of exceptional beauty.

Large Bulbs—25c for 3; \$1.00 per dozen; \$7.50 per 100.

EMPEROR—Brilliant golden yellow flowers of immense size, with wide over-lapping perianth. Extra fine.

Large Bulbs—25c for 3; \$1.00 per dozen; \$7.50 per 100.

Leedsii Narcissus

Long Crowned

HERA—Creamy white star-shaped perianth of broad petals and the deeply frilled cup of creamy white with a dainty edging of light primrose makes one of the most chastely beautiful of all daffodils.

No. 1 round bulbs—25c for 2; 65c for 6; \$1.25 doz.; \$8.00 per 100.

Jonquil

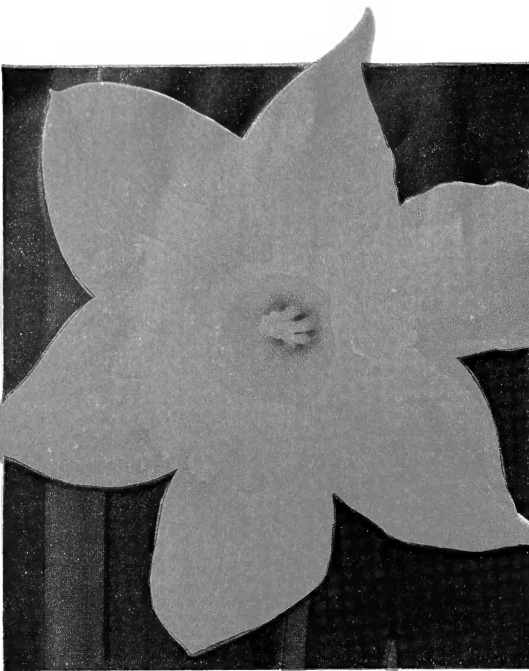

A species of Narcissus with very fragrant flowers; excellent for cutting. Culture same as for Narcissus.

JONQUIL—Campanelle Giant Single—The largest and finest single Jonquil; color pure yellow; very fragrant. 25c for 3; 90c per dozen; \$6.00 per 100.

Chinese Sacred Lily

Large Blooming Size

Chinese Lilies are wonderfully attractive as house ornaments and well deserve a place in the home of every lover of plants. The flowers are pure white with yellow cup. May be planted in the open ground or in bowls. After plants are through blooming in the home all Narcissus may be planted out of doors, and will bloom the following year. Culture of Chinese Lilies the same as for Paper Whites. Fancy, sound bulbs. 15c each; 75c for 6; \$1.50 per dozen.

King Alfred

Paper White Narcissus

True Grandiflora Type

Everyone knows the Paper White Narcissus. As a quick-growing bulb it has no equal. The flowers are pure white and very fragrant, produced on long, stiff stems. They can be forced into bloom in from 6 to 8 weeks' time, and by planting at intervals of four weeks apart you will have a succession of blooms throughout the fall and winter season. When grown in water, place the bowl in a dark cool place until sprouted 3 or 4 inches. Then move to light location and you will have blooms in a few weeks. Narcissus enjoys a cool temperature as warmth tends to grow excessive foliage. A small amount of charcoal in the water will tend to keep it cool and sweet.

Large Size Bulbs—15-16 ctm. 10c each; \$1.00 per dozen; \$7.00 per 100.

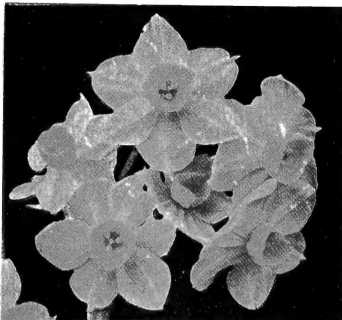

Soleil d'Or

Yellow Paper White Narcissus

Beautiful golden yellow flowers with deep orange cup. Can be bloomed just as easy as the Paper White Narcissus in bowls or out of doors. 25c for 2; 65c for 6; \$1.35 per dozen; \$9.00 per 100.

Single Narcissus

POETICUS HORACE—Large, star shaped, broad, white perianth with flat yellow eye, edged red. 10c each; \$1.00 per dozen.

Soleil d'Or

Paper White Narcissus

Chinese Sacred Lily

Liefgreen's Free Blooming Dutch Iris

Ready in September

Plant a few of these bulbs for their beautiful, graceful flowers. Dutch Iris are considered by many to be superior to Spanish Iris. They are earlier and larger. Easily grown in full sun or half shaded situations. Valuable for cutting. Plant in rows or clumps about three inches deep and 3 to 5 inches apart. The bulbs will naturalize and become stronger and throw larger blooms each season.

The bulbs should be planted during the late fall and winter and spring months.

Large Size Bulbs—25c each; \$2.50 per dozen. Postpaid.

JOHNSONI — Brilliant red and very large flowers. One of the very finest. Very seldom fail to bloom. 50c each; 3 for \$1.25; \$4.50 per dozen. Postpaid.

Calla Lily

Gladiolus, Minuet

GLADIOLUS . . . Liefgreen's Selected Bulbs

Plant more Gladiolus bulbs this winter. This beautiful flower thrives exceedingly well when planted from November and on during the winter months.

Gladioli will thrive in almost any soil with the exception of extremely heavy soils. They require full sunlight and are liable to injury only from rank manure. Plant the bulbs six to nine inches apart to a depth of about four inches. We recommend free use of water during the season of active growth, particularly as the buds begin to show color, which is beneficial in producing fine flowers. We can furnish Gladiolus bulbs from November to March.

Liefgreen's Gladiolus Garden Special

All No. 1 Bulbs, just under Jumbo Size. Excellent for large plantings.

40c per dozen; 75c for 25; \$1.35 for 50; \$2.50 for 100. All postpaid.

PLANT LIEFGREEN'S FLOWER SEEDS

General Planting Suggestions

Light, rich loamy soil is best suited to flowers. If the soil is of a heavy nature, add sand or peat moss and a liberal scattering of air-slacked lime to form a better texture. Prepare the soil as fine and smooth as possible. The depth of planting flower seeds is very important. Very fine seeds should be planted on the surface and pressed into the soil, then sprinkle over the surface a light mulch to aid germination. Medium sized seeds should be planted $\frac{1}{4}$ to $\frac{1}{2}$ inch deep, while larger seeds such as Sweet Peas, should go deeper. A light mulch should be spread over all seeds planted, as it is the best method of keeping the soil moist and cool. Water with a fine spray to avoid washing the soil from the seeds. When large enough, thin young plants from 2 to 12 inches apart, depending on the variety. Give them plenty of room to develop, allow plenty of moisture and good drainage and the results will surprise you.

LIEFGREEN'S GIANT SPENCER SWEET PEAS

How to Grow Sweet Peas

SWEET PEAS are so well known they need no description. We offer only the Giant Flowering Spencer strain in both the Early Flowering and the Spring Flowering types.

CULTURE: Sow seed in a location that receives morning and early afternoon sun. Seed may be planted from early fall to early spring. Dig a trench about a foot wide and deep and fill in with 6 inches of well-rotted manure. Mix a liberal amount of manure with the soil that has been removed and replace it. Flood bed thoroughly and allow to stand several days before planting seed. After the soil has settled sufficiently, open a trench in the bed about 6 inches deep and plant **ONE OUNCE** of seed to about 20 or 25 feet of row. During the warm weather cover seed about 2 or 3 inches deep and in cooler weather about 1 inch is sufficient. **CARE MUST BE TAKEN DURING WARM WEATHER NOT TO ROT THE SEED WITH TOO MUCH MOISTURE.** After planting seed soak the trench thoroughly and cover top with a light mulch of peat moss to prevent the surface soil from drying out and cracking. When the plants are up about 3 or 4 inches thin out to about 4 inches apart and begin drawing the earth to the plant to insure a deep root system. This makes a trench on each side of the plant along which the plant is watered. Provide a trellis or proper support as the vines attain great height. Frequent cultivation, water as needed after plants are up and occasional applications of Sweet Pea Food or a good all-purpose commercial fertilizer, will insure a profusion of lovely blooms. A long blooming season may be had by keeping the blossoms picked.

Something Different!

CUPID SPENCER SWEET PEAS, MIXED—Sweet peas in bush form. Lovely large blooms of true Spencer type, borne profusely on small trailing plants growing not more than 9 inches tall. Grand for borders and massing. Light shades, bright pink predominating. **Pkt. 15c, ½ oz. 25c, oz. 40c, ¼ lb. \$1.25.**

LIEFGREEN'S GIANT EARLY FLOWERING SPENCER SWEET PEAS

Plant the Early Flowering type sweet peas in the early fall and winter months for early winter and early spring blooming. Again early in the spring months for later spring blooming. This type sweet pea blooms from four to six weeks earlier than the Spring Flowering Spencers. The plant starts climbing immediately after germination. We offer the very latest and finest types adaptable to Arizona climate.

LIEFGREEN'S GRASS SEEDS

Liefgreen's Lawn Seeds are thoroughly cleaned and tested for purity and germination.

DIRECTIONS FOR PLANTING—First level the ground thoroughly and pulverize the soil. Enrich with our Lawn and Garden Fertilizer at the rate of 100 pounds to 3000 square feet. Scatter the seed evenly over the surface at the rate of 1½ to 2 pounds to 10 x 10 feet for Australian Rye Grass; one pound to 10 x 20 for Blue Grass; one pound to 500 square feet for Bermuda Grass and one pound to 2000 square feet for White Dutch Clover when planted with other grasses. After sowing spread a light mulch of Horticultural Peat Moss over the surface. The mulch will quicken germination and prevent the soil from crusting. Water carefully and regularly with a fine spray, never allowing the surface to dry out until the grass is up. Plant Rye Grass, Blue Grass and White Clover from September 1st until early spring and Bermuda Grass during the spring, summer and fall months.

When you buy Liefgreen's Lawn Grass Seed you avoid failure and disappointment.

Sow the SEED OF FREEDOM

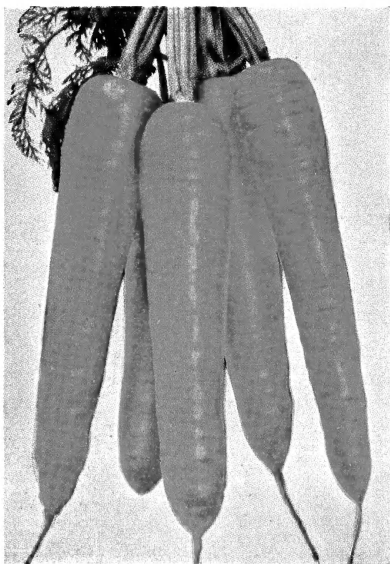

VICTORY GARDEN

America's fighting forces and those of our allies need food in great quantity. We can all help them get it by growing and canning at home. This will release these vital food supplies and the transportation facilities for our country's use. Do your part by growing all the food you can at home, and seeing that the surplus is preserved. We are doing our part by supplying you the finest seeds in the right varieties for Arizona's growing conditions.

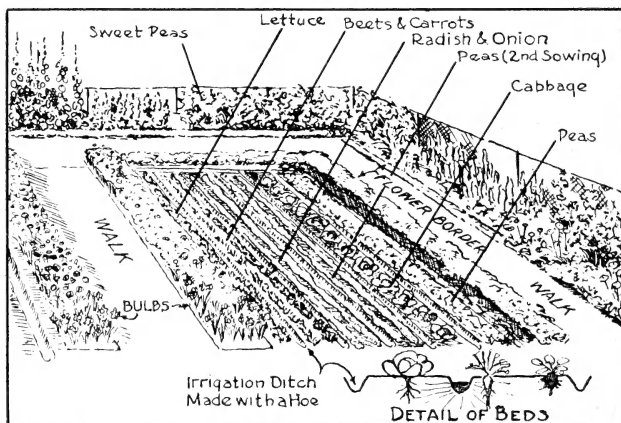

A home garden will supply your family with fresh crisp vegetables the year around. Make your spring garden carry on over the winter months. A good supply of garden fresh vegetables is the best insurance for good health. Healthy people make a healthy nation, a nation sure to be the victorious nation! Eat plenty of vegetables every day. It is a privilege to be able to grow our own vegetables, and to do our part in securing this, our Victory.

Lettuce, Arizona Wonderful

Imperator Carrots

The sketch above shows a portion of a vegetable flower garden for fall planting. It is adaptable to most backyard areas and will produce flowers for the house and vegetables for the table and canning. Vegetables are watered by ditches as shown; flowers by hosing. Use sweet peas to cover fences.
